

Client: General Electric
Completion: 2004

GE GLOBAL RESEARCH CENTRE, MUNICH TECHNICAL UNIVERSITY

We were appointed by General Electric to design and build their fourth worldwide, and first European, GE Global Research Center.

The 10.000m² building is situated at the Munich Technical University research campus in Garching, between Munich Airport and Munich City Centre.

It provides research facilities for GE alternative energy systems, power, sensors, electro-technology, advanced medical imaging, automotive applications together with conference facilities for 150 people.
