## GALERIE BUTOVICE, PRAGUE

This new destination shopping and leisure experience of approx. 65,000m<sup>2</sup> is focused around a key triple height entrance dome facing a transport interchange for train, tram and bus.

Within the dome, all levels are accessed by through the dynamic use of travelators and lifts.

An adjacent seven storey 10,000m<sup>2</sup> office building was part of the contract. It is clad in multicoloured glass panels and adds to the dramatic composition.
