

Client: Rezidor SAS
Completion: September 2005

RADISSON SAS, STANSTED AIRPORT

A brand new hotel linked to Norman Foster's terminal at Stansted Airport. BAA's brief required a sympathetic building with simple, elegant proportions clad in steel and glass. The hotel interior is designed to continue this theme while creating a warm and inviting atmosphere.

A four-storey glass wine tower dominates the centre of the large hotel atrium. This feature involved detailed development with structural engineers, wine storage experts and a circus / theatre company to design the computerised winches for wine angels to 'fly' through the tower.

The hotel provides 500 guestrooms in Rezidor's standard room styles, three restaurants, banqueting suite, conference facilities and 25 meeting rooms.
