Completion: 2007

BRAVO BRAVO RESTAURANT & BAR, PARK INN, HEATHROW

Our interiors team was appointed by Rezidor to design a new bar / restaurant catering for the full day to night-time dining and bar experience for guests. Rezidor's vision was that the design was contemporary, chic and 'the place to be' for a meal, a late drink and 'a boogie'.

Working closely with Speirs and Majors Associates, the lighting concept was designed to create an exciting space which changes throughout the day. Barisol ceilings, lit hanging beads, slatted timber ceiling and a curved feature wall were all used to diversify the space and seating choices in the restaurant. The lighting concept in combination with the various banquette and loose seating types creates different 'zones and experiences'.

Two large curved banquettes adjoin the bar area with the barisol and hanging beads above to provide a focus from the entrance which entices guests to come in and see what Bravo Bravo has to offer.

Furniture is simple and elegant, in leather and timber and polished chrome. Black American Walnut is used throughout creating a rich back drop for the passionate red, fuschia and orange bursts of colour in the carpets and leathers.

Over the chic white bar, area a series of projectors can display patterns and potential branding, using the bar and surrounding floor area as the screen and interfacing with the DJ booth and AV equipment throughout the space.
