

Client: Gateshead Regeneration Partnership
(Gateshead Metropolitan Borough Council /
One North East / English Cities Fund)

GATESHEAD REGENERATION

The framework establishes a set of key development, infrastructure and environmental projects as anchor schemes to create a framework for the revitalisation of the area.

It focuses on land use, planning and economic development demonstrating a comprehensive approach which supports both business and people and responds to the wider social inclusion agenda.

The framework also takes account of existing strategies and current initiatives and makes recommendation for their modification as appropriate.

The public realm is a major factor in creating the ambience and setting for the new developments.
